

FiberForce 100™

- Ultra fine denier monofilament micro fiber specifically engineered to reduce plastic shrinkage cracking of concrete
- Excellent for residential applications
- Excellent finishing
- Reduces plastic settlement

FiberForce 150™

- Monofilament microsynthetic fiber
- Specifically engineered to reduce plastic shrinkage cracking of concrete
- Excellent finishing
- Reduces plastic settlement
- Substantially reduces explosive spalling

FiberForce 300™

- Fibrillated microsynthetic fiber
- Replacement for 6x6 W1.4xW1.4 welded wire fabric – depending on the application
- Excellent distribution
- Excellent temperature -shrinkage reinforcement
- Reduces plastic settlement
- Enhances fatigue strength - provides residual strength
- Enhances impact, pullout and surface abrasion resistance

FiberForce 500™

- Fibrillated microsynthetic fiber
- Replacement for 6x6 W1.4xW1.4 welded wire fabric – depending on the application
- Engineered for Precast and Ready Mix Concrete applications
- Excellent temperature-shrinkage reinforcement
- Reduces plastic settlement
- Enhances fatigue strength - provides residual strength
- Enhances impact, pullout and surface abrasion resistance

FiberForce 850™

- Blend of steel and microsynthetic fibers
- Provides both plastic shrinkage control and drying shrinkage control
- Enhanced, long-life durability
- Provides impact resistance

FiberForce 650™

- Embossed tape macrosynthetic fiber
- Co-polymer Technology polypropylene and polyethylene resins
- Secondary/post-first crack reinforcement
- Mechanically embossed to enhance bonding
- Performs equal to or superior to the other macrosynthetic fibers
- Excellent distribution
- Department of Transportation Approval- Where applicable

FiberForce 950™

- Blend of macro synthetic fiber/micro synthetic fiber
- Provides both plastic shrinkage control and drying shrinkage control
- Enhanced life cycle durability
- Provides perfect placement of reinforcement
- Recommended for slab-on-grade finishes
- Excellent drying shrinkage reinforcement

FiberForce 1000 HP™

- Embossed macrosynthetic fibers engineered for optimum finishing performance
- Emphasizes mechanical bonding
- Recommended for hard troweled slab on grade finishes
- Reduces plastic settlement
- Enhances fatigue strength - provides residual strength
- Excellent drying shrinkage reinforcement
- Extends service life with reduced maintenance

Color Code: Yellow
0.5 lb. Bag (standard)

Small (46"x46"x48"):
48 Bags/Box
27 Boxes/Pallet
1,296 Bags/Pallet
648 lbs. per pallet

Large (46"x46"x73"):
48 Bags/Box
36 Boxes/Pallet
1,728 Bags/Pallet
864 lbs. per pallet

Color Code: Green
1 lb. Bag (standard)

Small (46"x46"x48"):
24 Bags/Box
27 Boxes/Pallet
648 Bags/Pallet
648 lbs. per pallet

Large (46"x46"x73"):
24 Bags/Box

252 Bags/Pallet
756 lbs. per pallet

Color Code: Grey

5 lbs. Bag (standard)
Standard bag contains 4.4 lbs. of Omni fiber and 0.6 lb. of FiberForce 150 per bag.

Small (46"x46"x48"):
5 Bags/Box
27 Boxes/Pallet
135 Bags/Pallet
675 lbs. per pallet

Color Code: Purple
Bag weights range from 3 to 7 lbs.

Small (46"x46"x48"):
3 to 8 Bags/Box
27 Boxes/Pallet
648 lbs. (approx.) per pallet

Large (46"x46"x73"):
3 to 8 Bags/Box
36 Boxes/Pallet
864 lbs. (approx.) per pallet

Note: Custom bag weights and pallet sizes are available upon request for all products.
