

**PROJECT DATA**

APPLICATION TYPE	Slab on Grade Composite Metal Deck
------------------	---------------------------------------

**PARTICIPANTS**

OWNER	Franciscan Health, Inc.
-------	-------------------------

CONCRETE CONTRACTOR	Tonn and Blank Construction
---------------------	-----------------------------

READY-MIX CONCRETE SUPPLIER	Smith Ready Mix, Inc.
-----------------------------	-----------------------

FIBER SUPPLIER	FiberForce
----------------	------------

FIBER TYPE & DOSAGE	FiberForce 650™ 4 lbs. pcy
---------------------	-------------------------------

**DETAILS**

PROJECT DATES	Concrete placed Summer of 2017. Project slated to be completed in 2018.
---------------	--

The Franciscan Health Hospital in Michigan City, Indiana will open in 2018. The 440,000 square-foot hospital will have 130 inpatient beds and house the latest in technology and equipment in the cath laboratory and operating rooms. The Concrete Contractor, Tonn and Blank Construction, decided to use FiberForce 650™ fibers for the slab on grade and composite metal deck to help limit cracks and improve quality. The Contractor saved time by not having to worry about handling, storing or placing WWF. By using FiberForce 650, they were able to expedite concrete construction and create a safer working environment.
